# BREVILLE RECOMMENDS SAFETY FIRST

At Breville we are very safety conscious. We design and manufacture consumer products with the safety of you, our valued customer, foremost in mind. In addition we ask that you exercise a degree of care and adhere to the following precautions.

## IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS  
BEFORE USE AND SAVE FOR  
FUTURE REFERENCE

- Remove and safely discard any packaging material and promotional labels before using the Vacuum Pump for the first time.
- Do not place the Vacuum Pump on or near a hot gas or electric burner, or where it could touch a heated oven.
- Do not blend any ingredients while the Vacuum Pump is operating. Always apply vacuum before blending.
- Do not blend without having the vacuum valve assembled to the inner cap.
- Always ensure the Vacuum Pump is completely assembled with four AA batteries properly inserted before use. The attachment will not operate unless properly assembled.
- Ensure the Vacuum Pump is pressed to OFF before removing or replacing the batteries.

- Use 4 x AA (1.5V alkaline) batteries only. No rechargeable batteries.
- Non-rechargeable batteries are not to be recharged.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the appliance and safely disposed of.
- The supply terminals are not to be short-circuited.
- Do not incinerate this appliance even if it is severely damaged.
- Do not put batteries in or near fire, the batteries can explode in a fire.
- Always remove the batteries if the Vacuum Pump will not be used for six (6) months or longer.
- Do not attempt to operate the Vacuum Pump by any method other than those described in this book.

- Do not place anything on top of the Vacuum Pump when stored.
- Keep the Vacuum Pump clean. Follow the cleaning instructions provided in this book.
- The attachment is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the attachment by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the attachment.
- It is recommended to regularly inspect the attachment. To avoid a hazard do not use the attachment if it becomes damaged in any way. Return the entire attachment to the nearest authorised Breville

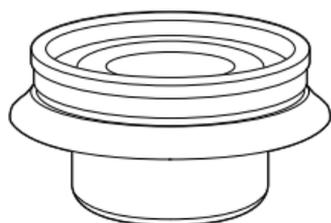

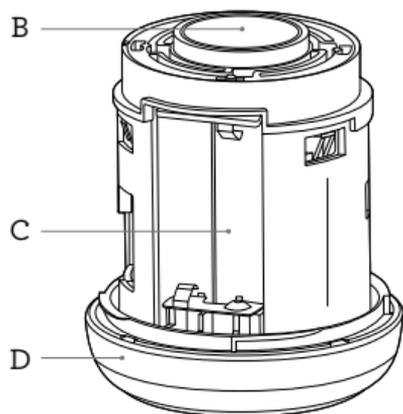

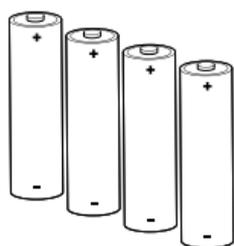

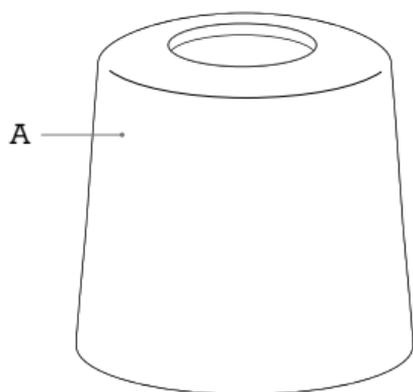

Service Centre for examination and/or repair.

- Any maintenance other than cleaning should be performed at an authorised Breville Service Centre.
- This attachment is for household use only. Do not use this attachment for anything other than its intended use. Do not use in moving vehicles or boats. Do not use outdoors. Misuse may cause injury.
- The Vacuum Pump is only intended for use with Breville blenders that come with a Vacuum Blend Lid.

**SAVE THESE INSTRUCTIONS**

# Components

- A. Vacuum Pump Housing
- B. Power Button
- C. Battery Compartment

- D. Vacuum Pump Base
- E. 4 x AA Batteries
- F. Inner Cap with Vacuum Valve

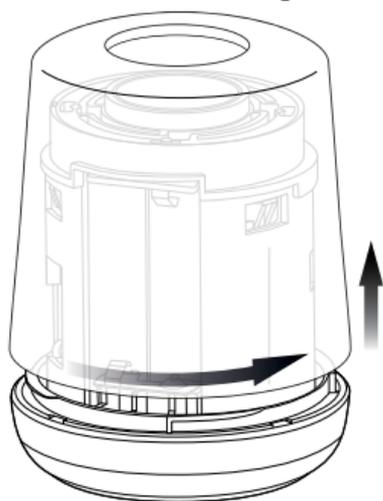

## Functions

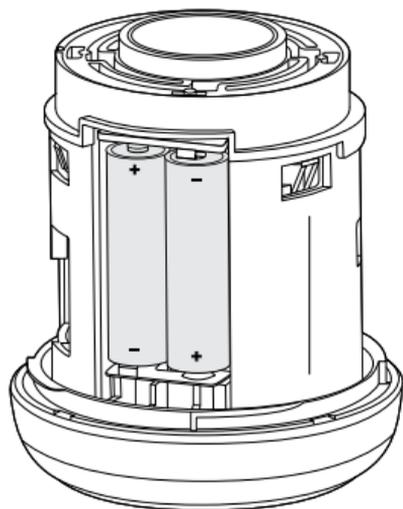

### BEFORE FIRST USE

Remove and safely discard any packaging material or promotional labels before using the attachment for the first time.

1. Open the battery compartment cover by twisting the Vacuum Pump housing to the right side while holding the Vacuum Pump Base.

2. Insert the batteries correctly and press firmly to click into position.

3. Replace the Vacuum Pump Housing.

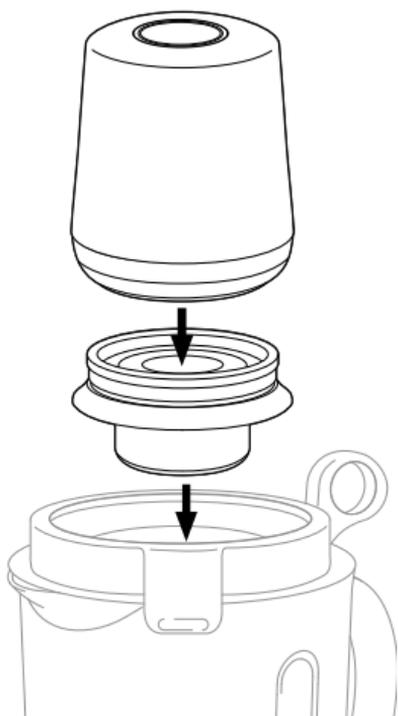

### USING THE VACUUM PUMP

Applying a vacuum pressure within the blender jug before blending green smoothies and vegetable dips can enhance flavours, change the texture and improves the overall taste experience.

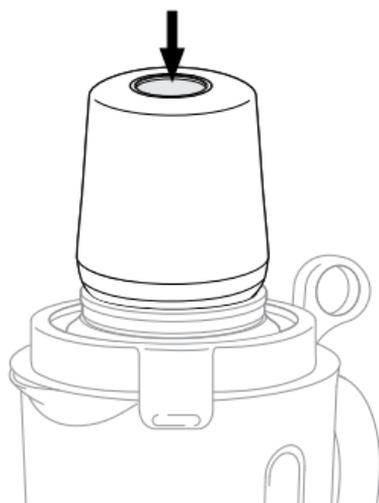

We do not recommend using the Vacuum Pump for all blending processes. For example, dairy based mixes taste better with air bubbles.

Also, if your food doesn't have a liquid element - herbs, spices, or nuts, for example - vacuum blending will not have a noticeable impact.

1. To get started, fill the blender with ingredients and close the lid firmly.
2. Replace the inner cap of the the blender lid with the inner cap of the vacuum pump.
3. Place the Vacuum Pump on top of the Inner Cap with Vacuum Valve.

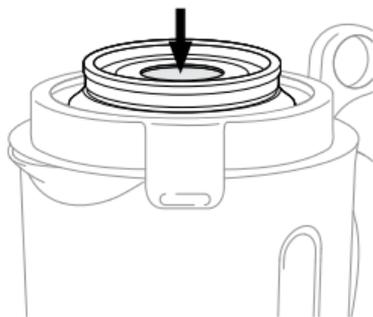

4. Press the POWER Button to turn on the Vacuum Pump. The Vacuum Pump will automatically stop once a vacuum pressure is reached.

5. Remove the Vacuum Pump from the blender lid.
6. Operate blender as per manual.

7. Press the Vacuum Valve to release vacuum pressure from the blender jug for easy removal of the blender lid.

The Inner Cap with Vacuum Valve can now be left in the blender lid for any blending tasks, whether it be Vacuum-Blending or Non-Vacuum Blending.

## **WARNING**

Always wait until the Vacuum Pump has stopped before turning on the blender.

Do not blend any ingredients while the Vacuum Pump is operating, as this could cause damage to the pump.

## **LIGHTS AROUND POWER BUTTON**

A white LED ring will be visible around the Power Button when the Vacuum Pump is in operation.

If the battery becomes low, the LED ring will flash red for 5 seconds after vacuuming. In this case the Vacuum Pump won't be able to achieve vacuum pressure anymore. Please change all 4 batteries and dispose of the old ones.

## Care & Cleaning

### INNER CAP WITH VACUUM VALVE

- Can be cleaned in dishwasher
- For thorough cleaning remove the Vacuum Valve from Inner Cap for hand-cleaning.

### VACUUM PUMP

- Always ensure the Vacuum Pump is kept clean after each use.
- Wipe the Vacuum Pump with a clean, damp cloth after each use.  
Do not use harsh abrasives or caustic cleaning products when cleaning this attachment.
- Ensure the Vacuum Pump is thoroughly dry after cleaning.

### NOTE

Never immerse the Vacuum Pump in water or any other liquid. Do not place the Vacuum Pump in the dishwasher.

### STORAGE

Store the Vacuum Pump on a flat, dry surface.

Always remove the batteries if the Vacuum Pump will not be used for six months or longer.

### WARNING

### KEEP BATTERIES OUT OF REACH OF CHILDREN

Dispose of used batteries immediately and safely.
