# OPERATING

your Breville Handy Mix™

### BEFORE FIRST USE

Remove and safely discard any packaging material and promotional stickers before using the appliance for the first time. Wash the beaters and dough hooks in warm soapy water with a soft cloth. Rinse and dry thoroughly. Wipe the motor body with a damp cloth then dry thoroughly.

#### NOTE

When first using your hand mixer, you may notice an odor coming from the motor. This is normal and will dissipate with time.

### USING THE HAND MIXER

1. Ensure the ON/OFF switch is in the OFF position and the power cord is unplugged from the power outlet.
2. To insert the flat beaters, insert beater, one at a time, into the attachment sockets (flat beaters can go into either side). Push firmly, turning slightly if required, until they click into place. To insert the dough hooks into the attachment sockets, insert the dough hook with the collar into the larger hole of the two attachment sockets of the hand mixer. Push firmly, turning slightly if required, until it clicks into place. Then place second dough hook into the smaller hole.
3. The attachment shaft with collar should be inserted into the larger hole, while the attachment shaft without collar should be inserted into the smaller hole.

4. Select a mixing bowl large enough to accommodate the attachments, as a bowl that is too small will damage the attachments. Add ingredients to the mixing bowl as directed in the recipe.
5. Insert the power plug into a power outlet.
6. Place the attachment (beaters or dough hooks) into the ingredients inside the mixing bowl. To commence mixing, move the ON/OFF switch to the ON position. Push the INCREASE SPEED **+** button until you have reached the required speed. If you wish to make the speed slower at any time, push the DECREASE SPEED **-** button. The LCD screen will display the selected speed as well as the mixing time that has elapsed.

#### NOTE

Always begin mixing on a lower speed setting to prevent splattering, increasing to the desired speed for the mixing task.

## OPERATING YOUR BREVILLE HANDY MIX™

7. Move the hand mixer in a slight circular action during mixing to allow the attachments to efficiently mix the ingredients. Stop the hand mixer intermittently and use a plastic spatula to scrape down the sides of the mixing bowl, then continue mixing.

### NOTE

To stop mixing at any time, move the ON/OFF switch to the OFF position or decrease the speed to '0'.

### NOTE

Always turn the hand mixer OFF if you need to scrape down the bowl during use.

### NOTE

Avoid allowing the attachments to hit against the side of the mixing bowl while the hand mixer is operating as this will result in damage to the attachments.

### CAUTION

*Ensure the hand mixer is switched off and unplugged from the power outlet before inserting the attachments.*

### CAUTION

*Avoid contact with attachments during operation. Keep hands, hair, clothing, spatulas and other utensils away from the attachments to prevent personal injury or damage to the hand mixer.*

8. When mixing is complete, move the ON/OFF switch to the OFF position then unplug the power plug from the power outlet.
9. Remove the attachments by pressing the EJECT button while grasping the attachment shafts. The attachments will be released automatically.

### NOTE

**DO NOT** try to pull the attachments out of the sockets without pressing the EJECT button.

## TURBO BOOST FUNCTION

Pressing the TURBO button while mixing provides an extra burst of power (overriding the speed setting being used). Press the TURBO button and hold it down for no more than 30 seconds to avoid overheating. After the TURBO button has been used, always turn the hand mixer off and allow it to cool for a few minutes before using again.

## TIMER FUNCTION

Many recipes will tell you to mix or beat ingredients together for a certain amount of time. Your hand mixer has a timer function which allows you to see how long you have been mixing. Once you begin operating the hand mixer, the timer will automatically start counting. Once the hand mixer is switched off, the timer will automatically return to 00:00.

# CARE & CLEANING

your Breville Handy Mix™

## CARE & CLEANING

### CLEANING

1. Before cleaning, ensure the ON/OFF switch is in the OFF position and the power plug is unplugged from the power outlet.
2. Press the EJECT button and remove the attachments.
3. Use a rubber spatula to remove any mixture remaining on the attachments. Wash the beaters or dough hooks in warm soapy water with a soft cloth. Rinse and dry thoroughly. The attachments may also be washed in the dishwasher. Do not allow the attachments to soak in water for an extended period of time as this may damage the metal finish.

### NOTE

Do not use abrasive scouring pads or cleaners when cleaning the attachments as these may scratch the surface.

4. Wipe the motor body with a damp cloth and dry thoroughly. Polish with a soft dry cloth.
5. Wipe any excess food particles from the power cord.

### CAUTION

*Never immerse the hand mixer, power cord or power plug in water or any other liquid.*

### STORAGE

Always unplug the hand mixer from the power outlet before storage. Wrap the power cord around the motor body. Stand the motor body upright on its heel rest. Safely store the attachments to avoid damage.

# MIXING GUIDE

for your Breville Handy Mix™

### MEASURING AND WEIGHING INGREDIENTS

#### Weighing Scales

For consistent results it is recommended to use weighing scales if possible as they provide greater accuracy than measuring cups. Place a container onto the scale, tare (or zero) the scales, then spoon or pour ingredients in until the desired weight is achieved.

#### Dry Measuring Cups and Spoons

For dry ingredients, use nested plastic or metal dry measuring cups and spoons. Do not use tableware cups or spoons. It is important to spoon or scoop the dry ingredients loosely into the cup. Do not tap the cup or pack the ingredients into the cup unless otherwise directed eg. packed brown sugar. This extra amount can affect the critical balance of the recipe. Level the top of the cup by sweeping the excess with the back of a knife.

When using measuring spoons for either liquid or dry ingredients such as yeast, sugar, salt, dry milk or honey, measurements should be level, not heaped.

#### NOTE

1 Australian tablespoon = 20ml

1 Australian teaspoon = 5ml

#### Liquid Measuring Cups

For liquid ingredients, use transparent plastic or glass liquid measuring cups with the measurements marked clearly on the side. Do not use non-transparent plastic or metal measuring cups unless they have measurement markings on the side. Place the cup on a horizontal flat surface and view markings at eye level. The level of the liquid must be aligned to the appropriate measurement mark. An inaccurate measurement can affect the critical balance of the recipe.

#### NOTE

Do not use tableware, cups or spoons when measuring ingredients.

#### NOTE

1 Australian cup = 250ml

A speed indicator is conveniently printed on the motor body with the suggested mixing tasks for each speed setting. Use this in combination with the tables below:

**QUINOA, LINSEED AND CHIA BREAD**

Makes 1 loaf

**INGREDIENTS**

- 1 tablespoon black chia seeds
- 1 tablespoon linseeds
- 2 teaspoons white quinoa
- 2 teaspoons red quinoa
- 1 ½ cups water
- 1 ½ teaspoons salt
- 3 ⅓ cups bakers flour
- 2 teaspoons white sugar
- 2 teaspoons instant dried yeast
- White and brown quinoa extra for crust

**METHOD**

1. Combine chia, linseed and quinoa in a small bowl. Add ½ cup of the water and mix well; set aside for 20 minutes.
2. In a bowl combine salt, flour, sugar, yeast, remaining 1 cup water and soaked seeds. Mix on speed 1 for about 5 minutes. If necessary turn beaters off and scrape sides to lift any flour.
3. Place dough ball into a lightly oiled bowl, cover and rest in a warm drought free place for 30 minutes or until dough has doubled in size. Turn dough out on a floured surface and knock back (punch) the dough to remove excess air, lightly knead.
4. Preheat oven to 200°C no fan (180°C with fan).

5. Once doubled in size, turn again onto a lightly floured surface and lightly knead just enough to bring dough together. Using your hands gently push the dough to make a rough rectangle, about 30cmx20cm. Bring one long edge of the dough into the centre then bring the other long edge in. Pinch seam together to seal. Brush with a little water and sprinkle generously with extra quinoa. Flip dough over so the seam is down and repeat with water and quinoa. Carefully lift onto a baking tray and cut three shallow slits in top; cover with a clean tea towel and stand in a warm place for 20 minutes.
6. Bake in oven for 30-35 minutes or until golden brown and hollow when tapped on top. Transfer to a wire rack to cool.
