## MEDIA RELEASE

**New product**  
**Available: April**

### Frypans that will revolutionise home cooking

One of the most versatile kitchen appliances, the electric frypan, has been transformed by Breville. Used for cooking everything from scrambled eggs and pancakes to spaghetti bolognese and paella, the new **Breville Thermal Pro** range delivers precision simmer control and even heat distribution, solving the greatest frustrations of electric frypan cooking.

These new kitchen must-haves are engineered with the thermostat closer to the heating element. This allows faster detection and recovery of temperature fluctuations for consistent even heat across the entire cooking surface. No more hot or cold spots, which is ideal when cooking corn cakes, fish patties, pancakes and blinis with both sides perfectly golden from edge to edge.

The cast-in 2400 watt butterfly element delivers powerful heat while the specially designed construction and probe ensures precise temperature control, optimal heat retention and efficient transfer to cooking surface.

The latest engineering and superior performance is complemented by a sleek new look with an integrated base design that can go from kitchen to table. Including two models – stainless and PFOA free non-stick – the new large banquet style Thermal Pro frypans feature cast stainless steel handles, pan tilt, 15 heat settings, a trivet for steaming and roasting and are dishwasher safe.

Breville Thermal Pro enables cooks to sear and simmer with confidence - and please a crowd.

**Breville Thermal Pro stainless (BEF500) \$169.95 rrp**  
**Breville Thermal Pro non-stick (BEF450) \$129.95 rrp**
