MEDIA RELEASE

December 2011

Clarity in the cup with new see-through kettle

The mesmerising bounce and bubble of boiling water is in full view with the new **Breville Crystal Clear** kettle (BKE290).

Beautifully crafted using the finest and most durable SCHOTT glass from Germany, the Crystal Clear kettle brings the natural purity and elegance of glass to the kitchen bench. Whether preparing tea and coffee, or adding liquid during food preparation, the kettle's rapid boil technology delivers hot water fast. Most importantly, the cleanliness of the water and the kettle is easy to monitor.

As the leader in glass kettles in Australia, Breville has designed the Crystal Clear for both function and style. It features a large seven cup (1.7L) capacity with the water chamber in full view. The on/off button illuminates when boiling and a multi-directional cord free base allows easy maneuverability around the kitchen.

The kettle's concealed heating element distributes heat evenly and is paired with safety boil dry protection to stop the appliance from heating if the water level is too low.

Breville Crystal Clear kettle BKE290 \$99.95 rrp
