Handy kitchen mixer on stand-by

Whipping cream, beating eggs and mixing batters or sauces by hand is more precise with the new **Breville Handy Stand Mixer™ (BHM600)**. Operating as either a manoeuvrable hand mixer or fixed stand mixer, this versatile baker's tool can track mixing times and features unique load sensing beaters that intuitively control the power required for each mixing task. This ensures ingredients are thoroughly combined which reduces overbeating and produces better results.

As a hand mixer the spring loaded, silicon-tipped beaters can be in constant contact with the base of the bowl for effortless mixing and exceptional whisking. It easily releases from the base as a lightweight helper for a variety of food preparation tasks.

As a stand mixer, two independent motors spin the bowl against the beating action, decreasing mixing time and providing power to mix evenly – from bread dough to desserts. It saves on the muscle required when working thicker mixes.

Simple to use and easy to store, the Handy Stand Mixer features 12 easy to select speeds with pulse/boost and a count-up timer – all displayed clearly on the electronic LCD screen. Including a 3.5 litre stainless steel bowl the new Breville Handy Stand Mixer is the smart way to mix up the next culinary creation.

Breville Handy Stand Mixer™ (BHM600) \$169.95 rrp
