Air Fried Zucchini Fries with Herbed Yogurt Dip

Prep 35 minutes / Cook 12 minutes
Serves 6

Zucchini

2 medium zucchini (about 8 ounces/225g each)
2 teaspoons kosher salt, divided
1 cup (55g) panko breadcrumbs
1 cup (60g) finely grated Parmesan cheese
1 teaspoon Italian seasoning
Pinch cayenne pepper
¼ cup (35g) all-purpose flour
2 egg whites

Herbed yogurt dip

1 cup Greek yogurt
1 clove garlic, minced
1 tablespoon minced chives
1 tablespoon chopped Italian parsley
1 teaspoon lemon juice
½ teaspoon kosher salt
¼ teaspoon freshly ground black pepper

Method

1. Cut the zucchini in half crosswise and then cut each half lengthwise into wedges ½-inch (1 cm) thick. Toss zucchini with 1½ teaspoons kosher salt and place in a strainer or colander set over a bowl. Let drain for 30 minutes. Rinse well under cold running water to get rid of excess salt. Use paper towels or a clean dish towel to dry the zucchini well.

2. To make the dip, combine all ingredients in a small bowl and stir until well combined. Cover and chill until ready to use.

3. Combine panko, Parmesan, Italian seasoning, cayenne and ½ teaspoon kosher salt in the bowl of a Breville food processor. Pulse until ingredients are well combined and slightly finer in texture, 5-7 pulses. Transfer panko mixture to a shallow dish.

4. Place flour and egg whites in two additional shallow dishes.

5. Working in batches, toss zucchini in flour and shake off any excess. Dip zucchini in egg whites and allow excess to drain off. Dredge zucchini in panko mixture, ensuring all sides are well crusted.

6. Arrange zucchini in a single layer on the airfry basket, leaving space between each piece.

7. Select AIRFRY/425°F (220°C)/SUPER CONVECTION/12 minutes and press START to preheat oven.

8. Cook in rack position 4 until brown and crispy, about 12 minutes.

9. Serve immediately with herbed yogurt dip.

2 tablespoons grapeseed oil, divided
1/2 pound (225g) ground pork
1 clove garlic, minced
1-inch (2cm) piece ginger, grated
2 cups shredded green cabbage
(about 4 ounces/115g)
3/8 cup shredded carrot (1 medium)
1 green onion, thinly sliced

Sweet chili dipping sauce
3/8 cup sweet chili sauce
2 teaspoons lime juice
2 teaspoons grated fresh ginger
1 teaspoon soy sauce

Method

Tips
For dehydrating fruits:
A good dehydrating temperature for fruits is 125°F (52°C). Dehydrating time will depend on the thickness and type of fruit. The thinner fruit is cut, the faster it will dry and the crispier it will become.

Some fruit (i.e. apples, pears and bananas) might discolor over the course of dehydration. This can be prevented by brushing the fruit with lemon-water. Higher acid fruit like pineapple will not brown as much.

Use firmer fruit when dehydrating whole pieces or slices. Overripe fruit is great in fruit leather.

The sweeter the fruit the more pliable the dehydrated fruit will be because of the elevated sugar content. Use young, firm pineapples for an even pale yellow result.
Dehydrated Honey-Rosemary Roasted Activated Almonds

Prop 5 minutes + 12 hours soaking, 15 minutes for the roasted almonds
Dehydrate 24 hours / Cook 8-10 minutes

Serves 4-6

Activated almonds:
- 8 ounces (225g) raw almonds
- 2 tablespoons kosher salt

Honey-Rosemary glaze
- ¼ cup (80g) honey
- 1 heaping tablespoon demerara sugar
- 1 teaspoon finely chopped fresh rosemary
- 1 teaspoon kosher salt

Method

1. Place almonds and salt in a bowl. Add cold tap water to cover the almonds by 1-inch (2cm). Let soak at room temperature for 12 hours to activate.

2. Rinse almonds under cold running water, then drain. Spread in a single layer on the dehydrate basket.

3. Select DEHYDRATE/100°F (38°C)/SUPER CONVECTION/24 hours. Place basket in rack position 4 and press START.

4. Dehydrate almonds for 24 hours or until dry and slightly crunchy but also spongy in the center. Almonds can be eaten plain or roasted per the following recipe.

To roast the almonds

1. Place honey in a small saucepan and heat over low heat until runny. Put activated nuts in a medium bowl and pour over warm honey. Stir to coat nuts evenly. Add sugar, rosemary and salt and stir to combine.

2. Line roasting pan with parchment paper. Spread almonds in a single layer on the roasting pan.

3. Insert wire rack into rack position 6. Select BAKE/350°F (175°C)/CONVECTION/10 minutes and enable Rotate Remind. Press START to preheat oven.

4. Bake for 8 to 10 minutes, rotating the pan and stirring almonds when Rotate Remind signals.

5. Let cool completely before storing in an airtight container.

What are activated almonds
Soaking almonds and other nuts is believed to break down the phytic acid they contain and may make them easier to digest. Nuts that have been soaked and dehydrated are called ‘activated’.

To activate almonds they need to be soaked in water for 12-24 hours and then dried at a low temperature to prevent them from getting moldy.
Dehydrated Bananas with Coconut

Prep 10 minutes / Dehydrate 26 hours
Yields 10 halves

1 cup shredded coconut
5 very ripe bananas, peeled

Method

1. Put coconut in a large shallow dish.
   Cut bananas in half lengthwise. Press banana halves in the coconut and arrange in a single layer on the dehydrating basket.

2. Select DEHYDRATE/125°F (52°C)/SUPER CONVECTION/26 hours. Place basket in rack position 4 and press START.

3. Dehydrate for 26 hours or until bananas are dry to the touch but still chewy with a sweet, intense banana flavor.

4. Let bananas cool completely before storing in an airtight container for up to 5 weeks.

Tip

For crispy banana chips, use bananas that are not very ripe. Cut them into ¼-inch (3mm) slices and dehydrate at 125°F (52°C) for 10-12 hours. Bananas should feel dry and brittle and snap in half easily.
Dehydrated Vegetable Chips

Prep 10 minutes / Dehydrate 12-15 hours
Yields approximately 2 cups each

<table>
<thead>
<tr>
<th>1 medium sweet potato</th>
<th>Spice mix for parsnip chips</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 medium parsnips</td>
<td>¼ teaspoon ground turmeric</td>
</tr>
<tr>
<td>2 medium beets</td>
<td>1 teaspoon kosher salt</td>
</tr>
</tbody>
</table>

Spice mix for sweet potato chips

- ½ teaspoon dried thyme
- ½ teaspoon onion powder
- ¼ teaspoon garlic powder
- ¼ teaspoon ground white pepper
- 1 teaspoon kosher salt

Red wine vinegar glaze for beet chips

- 2 tablespoons red wine vinegar
- ½ teaspoon kosher salt
- ½ teaspoon ground white or black pepper

Method

1. For the sweet potato chips, combine spice mix in a small bowl and set aside.
2. Peel sweet potato then thinly slice using a mandoline. Arrange slices in a single layer on the dehydrate baskets. Lightly and evenly sprinkle with the spice mix.
3. Select DEHYDRATE/125°F (52°C)/SUPER CONVECTION/12 hours. Place dehydrate baskets in rack positions 3 and 5 and press START. Check on crispness and rotate trays occasionally, every 4-5 hours. Chips should feel paper-dry and snap in half easily.
4. For the parsnip chips, combine spice mix in a small bowl and set aside. Peel parsnips then thinly slice using a mandoline. Arrange slices in a single layer on the dehydrate baskets. Lightly and evenly sprinkle with the spice mix. Dehydrate chips as per step 3, changing the dehydrate time to 6 hours.
5. For the beet chips, peel beets then thinly slice using a mandoline. Arrange slices in a single layer on the dehydrate baskets. Lightly brush with red wine vinegar and then lightly and evenly sprinkle with salt and pepper. Dehydrate chips as per step 3.

Note
You will need at least two dehydrate baskets to make this recipe. Otherwise, dehydrate in two batches. To prevent discoloring keep the remaining vegetables unpeeled in the fridge until ready to use.

A mandoline is a great tool to cut vegetables very thinly. Use it with caution as the blade is very sharp. Only use as directed on the packaging.

Dehydrating time will depend on the thickness and type of vegetables. Generally the thinner the vegetable is cut the faster it is drying and the crispier it will become.

Storing dehydrated vegetables

Once completely dried, store vegetables in vacuum sealed bags or containers for best results. The vegetable chips will keep for 3-4 weeks but are best eaten within 3 days.

Tips
For dehydrating vegetables

To prevent staining the dehydrate basket, line it with parchment paper before dehydrating beets. Once the beets are dry to the touch they can be placed directly on the basket to finish dehydrating.
Dehydrated Crackers

Yields 2 trays of crackers

1 cup (125g) sunflower seeds
¼ cup (75g) flaxseeds

3. Mix grated parsnip with 1 teaspoon turmeric and stir to combine. Add to the seed dough and stir to thoroughly combine. Divide the dough in half, and set aside one half.
4. Shape the first half into a disk and place it between two sheets of parchment paper. Using a rolling pin, firmly roll dough into a thin sheet the size of the dehydrate basket.
5. Place dough and parchment paper in the dehydrate basket. Remove top sheet of parchment.
6. Repeat steps 4-5 with remaining dough.
7. Select DEHYDRATE/150°F (65°C)/SUPER CONVECTION/6 hours and enable Rotate Remind. Place dehydrate baskets in rack positions 3 and 5. Press START.
8. Dehydrate crackers until dry. When prompted by Rotate Remind, rotate the baskets front to back and switch rack levels. Carefully flip over the cracker dough.
9. Remove baskets from oven and let rest for 10 minutes. Break crackers into shards.
10. Let cool completely before storing in an airtight container for up to 2 weeks.

Tip
For uniformly shaped crackers, use the tip of a knife to score the dough into shapes before dehydrating.

Note
You will need two dehydrate baskets for this recipe. Otherwise, dehydrate in two batches and keep the second batch refrigerated until ready to use.
Beef Jerky

1 pound (450g) of lean beef such as sirloin, flank steak or top or bottom round

Spice mix

- 4 teaspoons kosher salt
- 1/2 teaspoon freshly ground black pepper
- 2 teaspoons chili powder
- 1 teaspoon ground cumin

1 tablespoon garlic powder
1 teaspoon onion powder
1/4 cup brown sugar

**Method**

1. Trim the meat of any visible fat, then freeze for 1-2 hours until firm but not frozen solid. Using a very sharp knife, slice meat across the grain into 1/8 inch (3mm) slices.

2. Combine spice mix ingredients in a small bowl. Place meat in a medium bowl and rub the spice mix into the grain of the meat. Cover with plastic wrap and refrigerate for at least 8 hours or overnight. Meat can also be marinated in a large zip-top bag.

3. Arrange meat slices in a single layer on 2 dehydrate baskets.

4. Select DEHYDRATE/160°F (70°C)/SUPER CONVECTION/4 hours. Place dehydrate baskets in rack positions 3 and 5 and press START.

5. Dehydrate for 3-4 hours or until jerky shows no sign of redness and bends but doesn’t snap. Allow the jerky to cool completely before placing in an airtight container.

6. Store jerky in an airtight container for up to 3 weeks at room temperature or 4 months in the refrigerator.

**Note**

You will need two dehydrate baskets for this recipe. Otherwise, dehydrate in two batches and keep the second batch refrigerated until ready to use.

**Tips**

For making jerky

Thin slices will allow the heat to reach the center of the meat. Cut meat against the grain for a more tender, less chewy jerky and with the grain for a chewier jerky.

The salt and vinegar in marinades and spice rubs add flavor and help to destroy pathogens on the surface of the meat. Keep meat properly refrigerated before dehydrating.

Jerky can be made from different types of meat such as beef, pork, lamb and poultry. Leaner meat is better for jerky as fat does not dry and causes jerky to spoil faster.
Roast Turkey

Prep 15 minutes + 1 hour resting / Cook 2 hours + 30 minutes resting
Serves 12-14

12-14 pound (5.4 to 6.4kg) whole turkey 2 to 3 sprigs rosemary (optional)
2-3 tablespoons kosher salt 6 sage leaves (optional)
2 teaspoons ground black pepper ¼ cup (55g) unsalted butter, melted
1 small onion, quartered Special equipment:
4 to 6 garlic cloves, peeled Meat thermometer
⅛ lemon, halved Kitchen twine
6 to 8 sprigs thyme (optional)

Method

1. Remove turkey from the refrigerator and allow it to come up to room temperature for one hour before roasting. Remove giblets, rinse turkey and use paper towels to thoroughly pat dry the inside and outside of the turkey.

2. Combine kosher salt and pepper in a small bowl. Liberally season the inside and outside of the turkey with the salt and pepper mixture. Stuff the cavity with the onion, garlic, lemon and desired herbs.

3. Tuck turkey wings under the back and tie the legs with kitchen twine. Brush the outside of the turkey with melted butter.

4. Insert wire rack in rack position 8. Select ROAST/325°F (165°C)/CONVECTION/2 hours. Press START to preheat oven.

5. Line a jelly-roll or other shallow pan with foil and place the included broiling rack in the pan. Place turkey, breast side up, on broiling rack. Cook until a thermometer inserted in the thickest part of the breast reads 150°F (66°C), and the thickest part of the thigh reads 165°F (74°C). Carefully rotate the baking pan halfway through cooking. The total cook time will vary depending on the size of the turkey.

6. Remove turkey from oven, very loosely tent with foil and allow to rest for 30 minutes before carving. Do not skip this step, as the temperature of the turkey will continue to rise during resting, ensuring it is fully cooked through.

Note

Depending on the size and shape of the turkey, it may be necessary to crack the breastbone so that the turkey will fit in the oven. To do this, place the turkey on a stable surface and press firmly on the breastbone until it cracks. Repeat this several times, until the top of the turkey is slightly flattened.

Deep Dish Apple Pie

Prep 1 hour + 30 minutes resting / Cook 1 hour 15 minutes + 2 hours cooling
Serves 8

Dough
- 2¾ cups (360g) all-purpose flour
- 1 tablespoon sugar
- 1 teaspoon kosher salt
- 1 cup (225g) cold unsalted butter, cut into ¼-inch (1cm) cubes
- ½ cup (120ml) ice water

Fillings
- 5 pounds apples, peeled, cored and sliced ¼-inch (5mm) thick (can use one or more firm tart varieties such as Granny Smith, Pink Lady or Honeycrisp)
- 1 cup (200g) sugar, divided

Special Equipment
- 9½-inch (24cm) glass pie dish (2 inches/4cm deep)
- ½ cup (100g) dark brown sugar
- 1½ teaspoons ground cinnamon
- ½ teaspoon ground nutmeg
- ½ teaspoon ground allspice
- ½ teaspoon ground ginger
- ½ teaspoon kosher salt
- 3 tablespoons (45g) butter, divided
- 2 tablespoons cornstarch

For the dough
1. In a medium bowl, combine flour, sugar and salt. Whisk to mix thoroughly. Add butter and use your fingers to rub the butter into the dry ingredients until the butter resembles cornflakes. (If using a Breville food processor, pulse dry ingredients to combine, add butter and then pulse a few times until mixture resembles coarse bread crumbs.)

2. Add the ice water and use your hands to gently work the dough until it just comes together. Be careful not to overwork the dough. (If using a Breville food processor, add ice water and pulse a few times until the dough just starts to come together. It should not completely form into a ball.)

3. Turn dough out onto a lightly floured surface and form a ball. Divide the dough in half and form each portion into a disk. Wrap each disk in plastic wrap and refrigerate for at least 30 minutes.

4. Prepare the filling. While the filling is cooling, roll out the bottom crust to about 14 inches (35cm) in diameter and about ¼-inch thick (3mm). Gently fold it in half and drape it in the bottom of the pie dish. Carefully unfold the crust. Refrigerate for at least 10 minutes before adding the filling.

5. While the bottom crust chills, roll out the top crust. Place it in the center of a sheet of parchment paper. Gently fold the crust into quarters. Use the parchment paper to enclose the folded crust. Refrigerate for at least 10 minutes.
For the filling

1. In a small bowl, stir together ½ cup (100g) sugar, brown sugar, spices, salt and cornstarch. Set aside.

2. Heat a Dutch oven over medium heat. Add half of the butter and heat until melted. Add the apple slices and remaining ½ cup (100g) sugar, toss to coat evenly. Cook apples over medium heat for 10 to 20 minutes to slightly soften, gently stirring frequently to ensure even cooking. (Parcooking the apples with sugar will preshrink them and help prevent the large empty space that often forms beneath the baked crust.)

3. When the apples are softened, using the lid, drain off the liquid from the pan and discard. Add remaining butter and stir to evenly coat the apples. Spread the apples onto a rimmed baking sheet in a shallow layer and cool to room temperature. Set aside the Dutch oven, but don’t wash it.

4. After the apples have cooled, scrape them back into the Dutch oven and sprinkle with remaining sugar, spice and cornstarch mixture. Stir to coat apples evenly.

To bake:

1. Insert wire rack into rack position 8. Select BAKE/350°F (175°C)/CONVECTION/1 hour 15 minutes and enable Rotate Remind.

2. Place pie on the included pizza pan or other baking pan and bake for 1 hour and 15 minutes until crust is crisp and golden brown and juices are bubbling. Carefully rotate pie when Rotate Remind signals.

3. Remove pie from oven and allow it to cool on a wire rack for at least 2 hours before serving.

Tip
Line the pizza pan with foil in case juices leak out during baking.
